3DM Update 3 translation:  
The following is my personal remark: "Monarch" is a very honest person, when he said today he will release the first edition of the crack, we will be able to test it out today, just as he said the ranger could not crack GTAS at the moment of release , Ranger couldn't crack it. Today let us work together to crack GTAS Come on!

3DM Update 2 translation: We just received news from our crack team, analysis on GTA V is mostly complete, the crack team has successfully cracked the game on a second computer, after implementing the crack on a third computer, its will then be possible to write and publish a crack that can be applied to any computer. However, there may be bugs throughout the game at some point, such might cause the executable to unexpectedly terminated, the crack team did not have enough time to test the game play, if all goes well and you guys are willing to be lab rats, it is not impossible for us to release crack v1 tonight for you guys to test drive the game. If no one want to test drive the game, we can also run tests closed-door for a day or two, releasing the crack only after making sure all is well

The GTA V torrent uploader on kickass:  
[ShivShubb]: I know some repack groups are going to have a look on this repack  
Just try to give credits to where it belongs, which means, CorePack pirate
