

Sep 27, 2020 could you get more info on what you did? Maybe how you set up your server as well as your test client would help... Jun 9, 2017 check in the moba. registerd. so you when you want to delete the old code change the new register name. :) Oct 4, 2019 when you start the server all 3 clients should be able to connect. it says "Unable to Inject DataNetSDK2.dll", but I think this is just because my net... Mar 7, 2020 error message says: Unable to inject the file xkore-0.dll on line 41. It would be great if you could send a screenshot of the error, so that i can help you out. Sep 20, 2020 What settings/changes do you have to make to get your server running? Ggggggggggggggggggg Jul 12, 2020 My localhost is working, but the server is not. I cannot even login to the server via Teamviewer if my testing client is uninstaled. Dec 13, 2019 when trying to load dll into openkore if you open it then you will get the error... "Unable to inject NetRedirect.dll" Then you can manually load the dll and . Jan 24, 2020 The value "" from an attribute with an uppercace name was not used for substitution in "" or "". Apr 10, 2020 I have a mystery error, when opening up Ragnarok Client, it says "Unable to Inject NetRedirect.dll". The problem is that I know my version of Ragnarok Client is correct, and my DNS... Jul 1, 2020 only the 2 clients that are registered. I have a problem, i can run openkore server but i can t open the 2 clients. I have the same problem A: Unable to Inject *.dll Errors Unable to Inject.dll Errors

Aug 9, 2014 I ran this set of commands on my Windows Server 2012 R2 and I also have the same issues regedit /s C:\Program Files\Counter-Strike: Global Offensive\update.ini deleting the file named C:\Windows\Microsoft.NET\Framework\v2.0.50727\PolicyEnforcement.oders.cache deleting the file named .NETFramework\v2.0.50727\policyEnforcement.cache Removed all previous configs. Rebooted the machine. But the exception still arises and the hack wasn't effective ----- ** OMM: Caught BadImageFormatException, Module name: NetRedirect, Type name: System.Security.Principal.WindowsIdentity, Version: 4.0.0.0, Public key token: 00000000012AECC, Public key blob: 905C253850B4620C0D7E3D05CD75A625142789B3 ----- Re: Unable to inject Netredirect.dll I'm not sure what file in the update.ini needed to be changed... looking at your file is the same as mine, anyways, on step 7 that you linked to, what did you put in the "Net.Http.dll" field? also what steps did you take? if you need anymore info, I'm available to answer any questions via PM or comments. Does anyone know how to solve the issue? I run into the BadImageFormatException when I try and run the net.redirect.dll file Also I have tried renaming the file.netframework\v2.0.50727\policyEnforcement.cache and netframework\v2.0.50727\policyEnforcement.oders.cache and neither worked. Thank you. Was there an extension on the dll? I've faced the same issue and then decided to rename the file. The server service fails to start after the rename Re: Unable to inject Netredirect.dll you dont have to do anything for me, i have the same issue, and i tried renaming the file, but it still didnt work, it doesn't work in my machine too. what i did is to replace the dll with the one i have f678ea9f9e
